

Assignment 01 Course Overview

Submit word file to your lab instructor.

Q1.

- (a) List all the social media websites you can think of that may be turned into a social network.
- (b) Explain what features do they share? How are they different?
- (c) Group the chosen social media sites according to their features.

Q2. Before you started this course explain

- (a) What are some ways that makes social network analysis useful?
- (b) Explain what you think you might be able to accomplish with a better understanding of who is connected with whom.
- (c) What sites do you personally use? What are the overlapping features (such as- use instagram as photo-sharing website in addition to Facebook, which allows you to share photos)? Mention in below given template.

Social network Site1	Social Network site2	Overlapping features
----------------------	----------------------	----------------------

- (d) Why do you use two sites instead of one?
- (e) Do you use different social media sites for different purpose if sites use overlapping features? Why or why not?
